PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience, skilled in developing robust web applications using .NET Core, React, Node.js, MongoDB, and PostgreSQL. Hands-on experience in building scalable APIs, implementing secure data masking solutions, and contributing to high-quality, maintainable codebases. Adept in agile teams and cross-functional development with a strong focus on backend and frontend integration.

WORK EXPERIENCE

Software Development Engineer

Dec 2023 – Jun 2026

Grow Indigo Private Ltd, Mumbai

Project - Grow Online

- Built and maintained REST APIs for a rewards-based loyalty program, powering smooth transaction processing and dashboard integration.
- Developed backend services for reward configuration, transaction history, and scheduled jobs, keeping the platform reliable and up to date.

Tech Stack: Node.js, MongoDB, .NET Core, PostgreSQL, React Js

Project - Agricloud

- Led a Data Security PoC to encrypt requests and responses across React, Node.js, and .NET Core, strengthening platform-wide security.
- Built reusable NPM and NuGet encryption packages with built-in data masking, adopted by multiple teams.
- Built a Product Bulk Upload module for fast, multi-entity imports and bulk image uploads via ZIP files.
- Improved platform stability through CMS and IAM integrations, Schemes module updates, and cross-module bug fixes.

Tech Stack: Node.js, MongoDB, .NET Core, PostgreSQL, React Js

Project - Connect Plus

- Built a responsive React.js dashboard for an internal SaaS platform used across business teams.
- Connected .NET Core APIs via Axios and managed app state with Context API for a smooth, consistent experience.
- Added role-based access, protected routes, and reusable components, speeding up future development.

Tech Stack: React.js, Axios, Context API, .NET Core APIs, React Router, Material UI

Project - Field Connect

- Built a penalty calculation engine to handle sales returns based on product expiry and shelf-life rules.
- Automated proof-of-delivery tracking and confirmations using background worker services.
- Integrated WhatsApp, OTP, and email notifications with retry logic for reliable delivery alerts.

Tech Stack: .NET Core, ASP.NET (Web Forms), PostgreSQL, SAP APIs, Third-Party APIs

Project – Excel Plugin for Reports

- Built a custom Excel add-in using VBA to pull live data from Snowflake views, cutting manual reporting time.
- Designed a simple, filter-driven Excel interface for triggering view-based queries on demand.
- Automated parameterized Snowflake queries and exported results directly into Excel reports.

Tech Stack: VBA, Excel Add-in, Snowflake, SQL

Project – Farmer Portal

- Built a standalone JWT authentication service in .NET Core for farmer-specific APIs, without touching existing systems.
- Designed a secure token generation and validation flow with PostgreSQL-backed tracking, using Entity Framework and the repository pattern.
- Built a React dashboard connected to secure APIs, enabling safe, self-service farmer workflows.

Tech Stack: .NET Core, React.js, PostgreSQL, JWT, Entity Framework Core, REST APIs

Software Developer Intern

Jun 2023 – Dec 2023

Grow Indigo Private Ltd, Mumbai

- Developed an internal Wi-Fi request form using .NET Core and React.js to support employee onboarding.
- Led a Proof of Concept (PoC) for interactive, user-driven dashboards using Redash and Metabase for business analytics.

PERSONAL PROJECTS

Project - FleetPulse – Fleet Management & Real-Time Tracking

- Engineered a full-stack fleet management application enabling organizations to manage vehicles, drivers, trips, and real-time fleet operations through a centralized dashboard.
- Built RESTful APIs using Node.js and Express with Firebase for authentication and data management, implementing modular controllers, middleware, validation, and role-based access control.
- Implemented real-time vehicle/trip tracking using Socket.IO and interactive map visualization with Leaflet, enabling live fleet monitoring and operational visibility.
- Deployed the production frontend on Netlify and backend APIs on Render, with environment-based configuration and scalable cloud deployment.

Tech Stack: React.js, TypeScript, Vite, Node.js, Express.js, Firebase, Socket.IO, Leaflet, REST APIs, Netlify, Render

Live Demo: <https://fleet-pulse-dash.netlify.app/>

Project - Food Delivery Order Management

- Engineered a full-stack food delivery order management application enabling users to browse menu items, manage cart quantities, and place orders with delivery details.
- Built RESTful APIs using Node.js to manage menu data, order placement, and order-status updates, deploying the front end on Netlify and the backend on Render.
- Implemented real-time order tracking with status updates such as “Order Received,” “Preparing,” “Out for Delivery,” and “Delivered,” delivering a smooth, end-to-end ordering experience.

Tech Stack: React.js, Vite, Firebase, Node.js, REST APIs, Netlify, Render

Live Demo: <https://order-management-dash.netlify.app/>

TECH SKILLS

- **Languages:** C#, JavaScript (ES6+), TypeScript, SQL
- **Frontend:** React.js, Material UI, Redux, Redux Toolkit
- **Backend:** .NET Core, Node.js (Express), REST APIs
- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git, Postman, Swagger
- **Security:** JWT, AES Encryption, Data Masking
- **Other:** Agile (Jira), Visual Studio, VS Code

ACHIEVEMENTS

Tech Rising Star Award – 2024

- Recognized at the annual company conference for outstanding technical contributions and innovation across multiple projects.

ACADEMIC HISTORY

PG-DAC

Mar 2022 – Sep 2022

Centre for Development of Advanced Computing

MBA IT

2017 – 2019

Savitribai Phule Pune University

BCA

2014 – 2017

Dr. Babasaheb Ambedkar Marathwada University, Aurangabad

CERTIFICATION

Post Graduate Diploma in Advanced Computing (C-DAC) - 2022
